

F-4C “Phantom II”

Adopted by Fingal, Upleger & Czapla Families

The F-4 was originally developed for the US Navy as a carrier-based all-weather interceptor. The F-4C is the first version developed for the US Air Force who used it as an all-weather multi-role fighter. This McDonnell Douglas built aircraft was flown by the 171st Fighter Interceptor Squadron at Selfridge from 1978 until it was replaced by the F-4D in 1986.

AIRCRAFT STATISTICS

Wingspan: 38' 11"	Engine: J-79-15 (2)
Length: 58' 3"	Thrust: 17,000 lbs. each
Height: 16' 5"	Speed: 1,500 mph
Weight: 58,000 lbs.	1st Flight: 1963
#63-7534
