

RF-84F "Thunderflash"

Adopted by Cub Scout Pack 1711

The RF-84F, built by Republic, was the result of a need for a high-speed reconnaissance aircraft that could either evade an enemy or engage and defeat him. Cameras were located in the nose making it necessary to relocate the air intakes to the wing root. This aircraft was flown by the Michigan ANG at Detroit's Metropolitan Airport and Selfridge from 1958 to 1971.

AIRCRAFT STATISTICS

Wingspan: 33' 6"	Engine: Wright J-65-W-7
Length: 47' 6"	Thrust: 7,800 lbs.
Height: 15'	Speed: 629 mph
Weight: 25,390 lbs.	1st Flight: 1952
#51-1896
