

Wiesel MK/TOW Weapon Carrier

Adopted by John Neubert

The Wiesel 1 MK/TOW weapon carrier is an air transportable light-armored, front-driven track vehicle manufactured by Rheinmetall Landsysteme in Germany. Its armor provides protection against infantry weapons and fragmentation of artillery ammunition. In its MK configuration it is armed with an automatic cannon mounted on the hull deck on a ring-type mount. In its TOW configuration, it is armed with six protected anti-tank guided missiles and a seventh mounted outside at the rear. This Wiesel I was used for evaluation by the US Army.
